PROFILE

Applied AI student at TH Rosenheim with a background spanning economics, field linguistics, and hands-on ML and LLM engineering. Technical depth in Python, RAG systems, and transformer-based LLMs, combined with strong analytical foundations and years of high-stakes professional work. I build things that run in production, speak six languages, and bring genuine curiosity to the real-world effects of AI on organisations.

EXPERIENCE

Content Creator & Social Media Manager · TH Rosenheim *Jun 2025 – Present*

- Creating and managing content for the CS faculty Instagram; interviews with students and professors
- Developing content strategy and editorial planning; making technical topics accessible to a broad audience

Retail Sales Specialist · REI *Jul – Dec 2023*

- Advised customers on technical products, managed inventory, and trained new staff during peak periods

Linguist & Cultural Advisor · Mission Essential Personnel *2018 – 2021*

- Simultaneous interpretation across English, Pashto, and Dari in high-stakes NATO operational environments
- Editing and proofreading of translated materials; precision and reliability under pressure and ambiguity

Linguist · Bundeswehr (German Armed Forces) *2019*

- Simultaneous interpretation across English, Pashto, and Dari in high-stakes NATO operational environments
- Real-time interpretation at official conferences and coordination meetings

Radio Producer & Host · Nehad Radio *2014 – 2015*

- Produced and hosted programmes; scripted content and developed editorial voice

English Teacher · Ariana Education Center *2010 – 2013*

- Planned lessons, designed assessments, and tracked student progress across three years

PROJECTS

Contradiction Detector · github.com/ziaeywais/contradiction_detector *2025*

- Detects semantic contradictions between documents using vector retrieval paired with LLM-based logic checking
- Supports Claude and Ollama interchangeably; findings ranked by severity with a Streamlit dashboard and JSON/CSV export

Python · Anthropic SDK · sentence-transformers · ChromaDB · Ollama · Streamlit · pypdf · pytesseract

Private Technical Assistant — RAG System · github.com/ziaeywais/Private_technical_assistant *2024*

- Fully local RAG system for querying private PDF documents via natural language — no API calls, no cloud
 - Hybrid semantic + BM25 retrieval with relevance guardrail, cross-encoder reranking, and multi-turn query rewriting
- Python · LangChain · ChromaDB · BM25 · Ollama · sentence-transformers · Streamlit

EDUCATION

B.Sc. Applied Artificial Intelligence · Technische Hochschule Rosenheim Oct 2024 – Present
– Core coursework: Machine Learning, Deep Learning, NLP, Data Engineering, SQL

B.Sc. Economics · Balkh University 2014 – 2018
– Micro/macroeconomics, statistics, economic policy

SKILLS

Languages Python (primary), Java

ML / AI Scikit-learn, TensorFlow, Keras, PyTorch, LangChain

LLM & Agents Anthropic SDK, Ollama, prompt engineering

RAG & NLP ChromaDB, BM25, sentence-transformers, cross-encoder reranking, vector search

Data Pandas, NumPy, Matplotlib, plotly, SQL

Tools Streamlit, Git

CERTIFICATIONS

Machine Learning Specialization (3-course) · DeepLearning.AI / Stanford 2024
– Supervised Machine Learning: Regression and Classification
– Advanced Learning Algorithms
– Unsupervised Learning, Recommenders, Reinforcement Learning

Journalism Training Certificate · Tanin Journalism Training Centre 2014

LANGUAGES

Persian/Dari (native) · Pashto (fluent) · English (fluent) · German (conversational) · Hindi (conversational) · Urdu (conversational)
